(a) Readout sensitivity (FP expert) per reader block and flow step
step 0
step 1
step 2
step 3
first text block: most sensitive at every step
10^{-5}
10^{-6}
step 3
step 2
step 1
step 0
mean over blocks: step 3 / step 0 = 6.1×
$\|\Omega^{1/2} J_{v \leftarrow o_i}\|_F^2$ per readout element
0 2 4 6 8 10 12 14 16 18 20 22 24 26 28 30
reader block (DiT cross-attention block index)
white band: block reads text tokens · grey band: block reads image tokens
